ABSTRACT

- A method and system for automated settlement and on-line debiting of a financial transaction, such as an emergency-cash transaction, is provided. A bank
- 5 customer enters a foreign-branch bank and indicates a need for emergency cash. The customer is given a telephone by which the customer communicates with an interactive-voice response system in the customer's language. The system bridges the customer with the customer's home bank, which approves the requested emergency cash. A network in communication with the voice response system and
- 10 with the issuer automatically initiates an on-line debiting of an account of the customer. The network also initiates and carries out settlement between the acquirer and the issuer by way of settlement accounts.
